

Into the Village Map 3

PREVIEW BOOKLET

Into the Village: Map 3 is a map-pack by Crooked Staff Publishing that depicts the layout of a single fantasy building that has been drawn in a vaguely dark-age style. What follows is a brief overview of what is contained in this product:

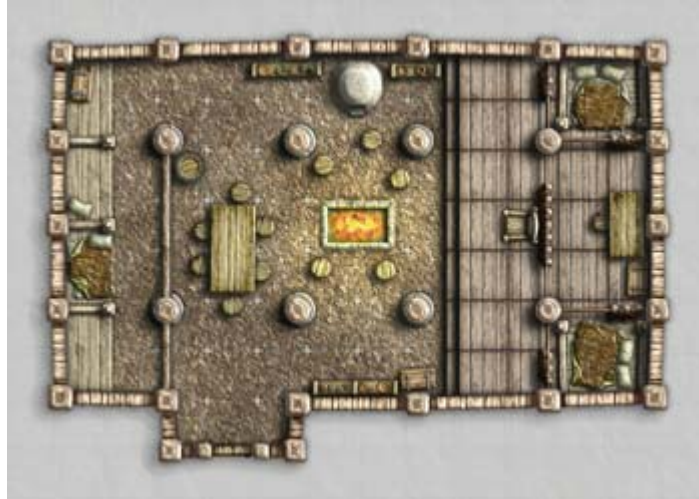

PDF BOOKLET

A pdf booklet that features a labelled version of the building (along with space/additional pages for the GM to add his/her own notes).

JPG IMAGE FILES

Each building from the *Into the Village* range is also provided as a jpg image file - making it ideal for use with virtual tabletops (note that these have been scaled at 100 pixels per grid square).

BATTLEMAPS

In addition, each building is also supplied as a multi-page pdf file (scaled at 1" per square) - so that they can also be printed out and used as miniatures scaled battle-mats.
